

SteelDoorDepot.com's Guide to Janus International Roll Up Doors

SteelDoorDepot.com is pleased to offer a range of coiling roll up doors manufactured by Janus International. Janus designs superior roll up sheet doors to exacting standards for commercial properties such as warehouses and self-storage businesses. For the homeowner, Janus doors are the preferred closure on sheds and outbuildings.

Janus International Doors are Built to Last

For both homeowners and business owners, protecting your property is a primary concern. Janus International's roll up doors are designed to last inside and out, with high-gauge steel construction and several features unique to the Janus brand, including:

- Bracket systems that can be adjusted vertically or horizontally
- Spiral torque tubes
- Specialized ratchet tensioning devices
- Pre-lubricated springs for longer life

Janus' roll up doors feature mechanisms that are designed with heavy use in mind, so they won't fail you over extended use. Most Janus commercial doors are available in wind load-rated versions that are built to meet the strictest building regulations. Many of Janus' roll up sheet doors also offer insulated versions to protect from extreme heat and cold. Janus doors can be fitted for electric openers which make them ADA-friendly and a breeze to operate, which limiting additional side room needed.

The Janus International Door Suite

SteelDoorDepot.com offers the following selection of Janus Doors:

650: A mini-door for the DIY crowd, the 650 is designed to install easily and require minimal maintenance. Features which other manufacturers offer only as expensive upgrades, such as factory-installed latches and ratchet tensioners, are included as standard. **Model 750** is the wind load mini door offering. Available up to 10'x10'.

1000: The Pre-Assembled Industrial Door (PAID) comes with brackets, tensioner, gears and chain drive preassembled, saving you time and money.

2000/2500: Janus' most adaptable sheet doors, optimized with deeper guide engagement for wider openings.

3000: A rolling sheet door for larger, more demanding situations, the 3000 is a non-certified wind lock door. Available up to 20'x18'.

3100: A certified wind load rated door that meets the most stringent building codes.
